

Mingyang Chen

(778)325-2487 | mingyangchen97@gmail.com | Canada

EDUCATION

University of Victoria

Master of Engineering in Applied Data Science (MADS)

Expected Graduate Dec 2026

Victoria, BC

University of Saskatchewan

Bachelor of Science in Statistic with Distinction

Jan 2020 – Jun 2024

Saskatoon, SK

- **Relevant Courses:** Experimental Design and Analysis, Prob. & Stochastic Processes, Multivariate Analysis, Time Series Analysis, Machine Learning, Quantitative Methods

SKILLS

- **Programming & Tools:** Python(NumPy, Scikit-learn, Plotly, PyTorch, TensorFlow, NLTK, Seaborn, Matplotlib), R(dplyr, tidyverse, ggplot2), SQL(MySQL, BigQuery, Oracle), Git, Docker, Tableau, Power BI, Excel(VBA), SAS, Salesforce
- **ML & Statistical Analysis:** Feature Engineering, Predictive Modeling, NLP, LLMs, PCA, A/B Testing, SHAP, Hypothesis Testing, Regression, Causal Inference, Decision Tree, Random Forest
- **Data Infra & MLOps:** GCP(BigQuery, Vertex AI), AWS(EC2, S3, Glue, SageMaker), Azure, Airflow, MLflow, Kubernetes

PROFESSIONAL EXPERIENCE

LearnWise Solutions Inc

Data Analytics

Sept 2024 – Dec 2025

Vancouver, Canada

- **Ingested, cleaned, and explored** 50K+ resume and job description records using **Python** and **SQL**, standardizing text fields and identifying experience distributions and key textual features to guide model feature engineering.
- Developed a resume–job matching pipeline leveraging TF-IDF feature vectors and similarity metrics (Cosine, Jaccard), **boosting ranking precision by 70% and reducing manual screening time by 30%.**
- Designed and deployed an interactive Tableau dashboard visualizing candidate–job relevance scores and funnel metrics, adopted by recruiter teams to accelerate top-candidate selection and streamline evaluation workflows.
- Coordinated with product and data engineering teams, leading weekly sprint reviews to align roadmaps, deliverables, and stakeholder feedback for continuous iteration.

Department of Math and Statistics, University of Saskatchewan

Casual Research Assistant

Sept 2025 – Dec 2025

Remoted, Canada

- Developed and validated a novel statistical imputation model to address high sparsity in **large-scale real-world datasets**, integrating **phylogenetic tree** distances distance metrics into latent structures to improve feature interpretability, resulting in improved data reconstruction accuracy and enhanced downstream analytical performance.
- Conducted a **large-scale simulation experiment** benchmarking four imputation methods, applying statistical and ML evaluation metrics to quantify reconstruction accuracy and ecological diversity preservation.
- Engineered an **end-to-end analysis pipeline** using **Python** and **R**, integrating **compositional data analysis** and **phylogenetic-aware distance matrices** to produce realistic microbiome modeling.

Hua Nanshan Culture Communication Co.

Business Data Analyst Intern

Feb 2024 – Apr 2024

Shanghai, China

- Designed and deployed an **end-to-end** churn prediction pipeline on 30K+ customer records with dozens of features, applying down-sampling to address class imbalance, which improved minority class detection by **12%.**
- Executed advanced **EDA** and **data preprocessing**, including detecting outliers, converting data types, and engineering derived and interaction features, achieving a 95% data completeness rate and enhancing model reliability.
- Built and fine-tuned multiple classification models, attaining **85% accuracy** in high-risk customer identification with a balanced precision-recall trade-off.
- Delivered predictive insights via an interactive **Power BI dashboard**, informing retention strategies that **reduced churn by 15% over six months** and generated **\$20K in retained annual revenue** through targeted A/B tested campaigns.

CHD Logistics Inc

Supply Chain Business Data Analyst Intern

Jul 2022 – Dec 2022

Saskatoon, Canada

- Designed and automated **ETL** workflows to integrate multi-source supply chain data from SAP ERP, WMS, procurement, inventory, and transportation systems, ensuring master data accuracy and SLA compliance.
- Delivered biweekly **KPI** reports and developed predictive **dashboards** using **time series forecasting** and **classification models**, reducing procurement costs by 18% and minimizing stockout risks for critical electrical components.
- Applied **GIS-based route optimization** and **A/B testing** of replenishment strategies to enhance logistics and inventory planning, reducing delivery lead times and cutting transportation costs by 15%, saving \$1.2M annually in carrying costs.
- Built and maintained interactive **dashboards** in **Tableau** for executive decision-making, collaborating with cross-functional teams on supply chain improvement projects, resulting in improved on-time project completion from 78% to 94% and a 26-point increase in customer satisfaction.
